

opti**mail** series

YOUR MAIL IS OUR BUSINESS

When the task is franking,
the solution is the

optimail 25/35 franking machine

Franking made easy

The optimail 25/35 is equipped for modern franking standards.

A digital, thermotransfer printhead and integrated security device make the optimail 25/35 a universal partner for your franking needs.

A high quality, immediately smear-proof indicium can include your company advert and ensure that your outgoing mail advertises your business.

SMART technology

FP's innovative SMART technology allows you to comply with VAT accounting for postal services.

Modern Franking System

The space saving, compact system is ideal for small to medium mail volumes and makes it possible to frank a wide variety of postal products.

The optimail 25/35 has all of the advantages of a modern franking system enabling, different advertising clichés, detailed text messages, multiple cost accounts and a function for adding a 'date stamp' on incoming mail.

User friendly? Of course!

Regardless of the advanced functionality, the optimail 25/35 is extremely easy to use! Your postal products can be selected with two touches of a button.

optimail 25

Sealer

The letter sealer is an optional add-on for machine-sealable envelopes. The sealer moistens and seals a letter in one step.

Optional: Integrated scale

The space saving, integrated scale: precisely detects weight and calculates the correct postage for your letters and packages.

Self-explanatory

Unique for its class - big, back-lit display! With self-explanatory, menu instructions.

FPConnect

FPConnect is the new digital connection to the FP World, which will allow you to download postage and rate tables onto your machine via the internet

Long lasting, good value, high quality imprint

The thermotransfer print head and high-quality ink ribbon cassette are an advantage in this class of machine: unbeatable price and ongoing value due to low consumption. The high resolution imprint (300 dpi) gives your envelopes a crystal-clear frank.

Postage: online 24/7

With the integrated modem, you are 'online' in an instant. You can reload postage at any time, any day, all day via our unique Teleset system.

Chip-card reader for every need

Simplified access control, quick loading of new advertising clichés and with the use of access cards, fast and secure cost-centre accounting - ideal for office environments.

Electronic text messaging

You can include a text message in addition to, or in replacement of an advertising cliché. Print up to five lines of text that include up to 20 characters per line.
